

Medicare Eligibility and Enrollment Training Series

START HERE TODAY : bit.ly/paftraining

Does Medicare have you confused?

Medicare is a federal health insurance program for people aged 65 or older and some people with disabilities. Patient Advocate Foundation has created a 7-module course to walk you through Medicare eligibility and the process of enrolling for coverage.

Building on more than 25 years of case management experience working with critically ill patients on health insurance challenges, we know the frequently asked questions and the reasons why Medicare coverage can seem overwhelming. In an hour, you will gain the confidence to identify when you are eligible for Medicare benefits, learn how to choose the best plan for your individual needs, understand how to navigate drug coverage, save money on healthcare expenses, and more.

After each module, you can test your knowledge with a short quiz and download helpful resources for future reference. We hope this training helps you better understand Medicare coverage so you can maximize its benefits.

This free training series is ideal for:

Clinical Support Staff • Providers
• Financial Navigators • Case Managers • Advocates • Community Health Workers • Community Health Educators • Social Workers • Patients
• Caregivers
